AUTOMATIC SLIDING DOOR SYSTEM

Accessibility, with diverse functions and an elegant design – we all expect this from automatic sliding doors.

They create convenient access points with maximum safety standards. GEZE sliding door systems are extremely narrow.

Despite this, the door drives are quite a force and move large and heavy sliding doors.

The result is discreet and sophisticated sliding door systems made of glass, for example for elegant foyers.

Our programme also includes real power packages and especially economical solutions.

AUTOMATIC SLIDING DOOR SYSTEM

Swing doors in many forms guide us comfortably through daily life. Swing doors – also called single-action doors – are everywhere.

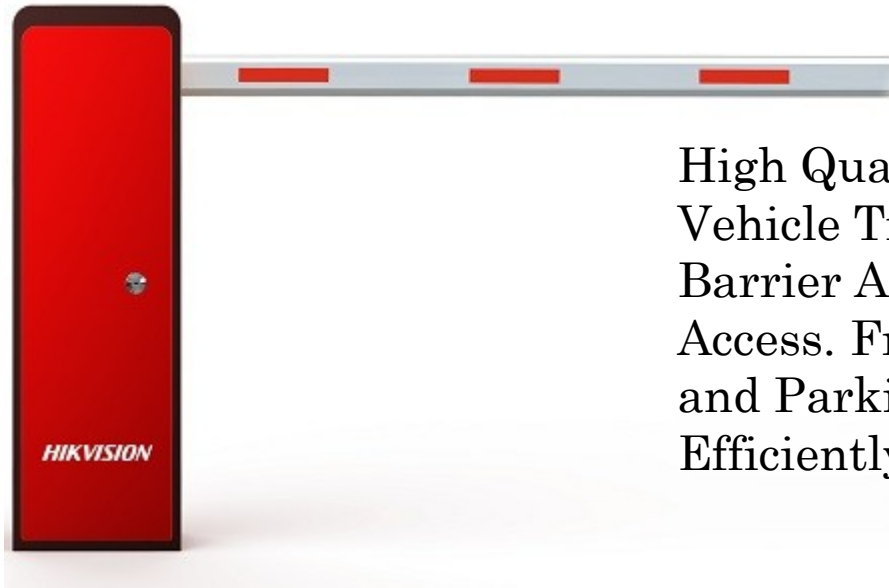

Be it as a barrier-free automatic door in private or public buildings, where doors should be opened with absolutely no effort, or varieties that are equipped with a door closer for manual opening

Door technology and drive systems by GEZE open and close swing doors comfortably, safely and in line with your individual needs.
